SINGLE LEAF SWING GATES

Available up to 3.5m wide, price as double gates less 5%

Iroko Hardwood Gates are given one coat of Antique Pine Sadolins unless otherwise agreed.

The Steel Frame is visible on the back of the gates and is finished galvanised and painted black. It can be left in the silver grey galvanised colour or painted another colour at an extra cost of £75 + VAT

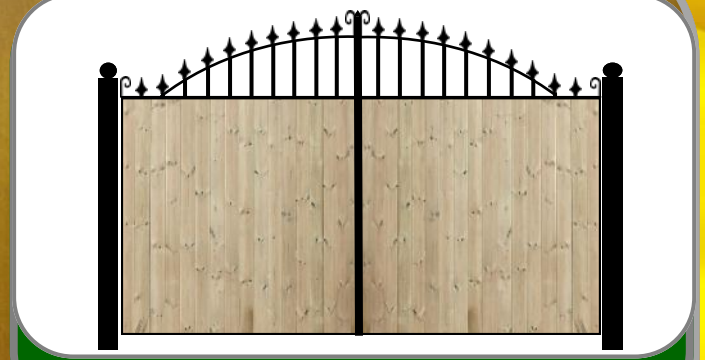

Safety The gate hinges are offset so as to reduce the gap between gate and post to 25mm, which is the Minimum required to avoid finger entrapment.

Clear Width when gates are open approximately 300mm of width is lost due to offset hinges

This image shows the gate viewed in the closed Position from behind, showing the steel frame that gives the gate it's strength and rigidity. This frame needs to extend beyond the opening to engage with the motor, this means you will need 700mm more space for gate to open into. (eg 3m gateway = 3.7m space)

It is possible if required to paint the metal frame in another colour to mask it from the wood.
